Subject: Entergy's Desire to Participate in "Computers in Classrooms"

Anita Lewis of Entergy's Economic Development Division (969-2392) phoned yesterday morning to express Entergy's desire to assist in placing computers in classrooms. She stated that Entergy wants to be involved in this, but does not want to duplicate any efforts by the Governor and would like to be a part of his efforts. I expressed our appreciation for Entergy's interest and told Ms. Lewis that I would have to obtain more detailed information on our plan in order to assist her.

I phoned Ms. Lewis this morning and left a message on her voicemail. I stated that the Governor's Office appreciates Entergy's interest and support for the program and that we definitely want them involved, but that we would like to fully develop our plan first so that we can spend their dollars efficiently and without waste. I told Ms. Lewis that I would keep her posted as to the progress of the program and that I would be calling her in the future w/ more details as to how Entergy can be involved.
