

*Remarks for the
American Federation of Teachers Convention
May 3, 2003*

- Recognize Maryann Gracyzk

- Mississippi is taking on a different image
 - Image of a state moving faster than anyone else into the 21st century
 - A state that's competing and leading in the global marketplace
 - A state that's setting new standards in education and economic development

- In today's economy, Mississippi is like many other states

- Every state impacted by national recession
 - More than \$7 trillion lost in stock market
 - More than 2 million Americans out of work
 - States cutting school week / releasing prisoners / massive lay-offs

- Have to protect people in the short term while preparing for the long term
 - Best way to do that is through investing in education and creating jobs

- Education is our first priority / has been for past three years since I've been in office
 - Public schools are our cornerstones of our communities and the key to the success of our economy.

- Mississippi is a recognized leader in education
 - Teacher pay / 49th to 19th when fully implemented
 - Princeton Review: 6th best testing system in nation
 - Leading other states in preparedness for “No Child Left Behind” / USA Today article

- SREB: Mississippi first state in southern region to have plan for “No Child Left Behind” approved
 - Speaks volumes of the good work being done here

- One of the most exciting successes in education is in technology
 - Every public school classroom in the state has Internet-accessible computer
 - Mississippi first state in the nation to achieve this goal / confirmed by NGA

- Mississippi's investing in education
 - Increasing investment while others are cutting
 - That is significant in light of national recession
 - Demonstrates our priority / our commitment

- 2003 legislative session: challenged Legislature to fund education first
 - Historic action
 - Strong precedent for the future
 - Education will not be a second priority

- Efforts in education didn't just start this year
 - Have been working on this since I took office
 - We are making strong progress

- We're proving to the people of Mississippi, and the rest of the nation, that we're serious about education
 - Making the investment now for dividends tomorrow

- When it comes to education, we mean business
 - Business means jobs

- Another image of Mississippi that's changing
 - No longer a state that depends on agriculture / low wage jobs
 - We are aggressive about creating quality, high-paying jobs for our people

- Strong growth over past 3 years
 - 2,103 new and expanded facilities
 - More than 50,000 new jobs
 - Total business investment in Mississippi of \$14.1 billion

■ Mississippi Rural Economic Impact

Authority has passed

- \$10 million to aid economic development in rural areas
- Funding to cover workforce training at community colleges

■ We're looking to the future of MS / where do we want to go?

- Good schools / good jobs / good communities

- The image of the Mississippi of 2003 is unlike anything anyone could have imagined
 - It's an image of people working in highly-skilled, well-paying jobs
 - It's an image of children in classrooms equipped with the technology to bring the world to their desk
 - It's an image of global companies looking for a place to do business in the state

- Thank you for the role you're playing in changing the image
 - Let's build our future based on what our future can be
