TRIBAL PRIORITY ISSUES

Clearinghouse available about what is out there now---how accurate is the data
- Establish a web-based clearinghouse for sources of data and technology-----looking for information products (1)
- Land use for community planning------6mo – 1 yr.) cycle (*1)
- Cultural resource identification and mapping (*2)
- Everglades restoration
- Need for training (2)
- Invasive plant species (*6)
- Surface mining impacts on the environment of surrounding ecosystems/hydro flow patterns *
- Natural resource management including forests, grazing, surface mining, Everglades restoration
  - Improve forest management information (*7)
  - Inventory and permit monitoring

Partnering with regards to training, e.g. universities

- Full partnerships are not possible because of sovereignty issues (3)
- Monitoring condition of grazing lands (overgrazing/under grazing)
- Air and water quality related to public health→ respiratory (*3)
- Identify locations of traditional foods and medicines (*5)
- Emergency planning/forecasting/response (*4)
- Security issues for data/info
