

December 10, 2001

Mr. Joseph H. Baker, Jr.
M. W. Smith, Jr. Foundation
PO Box 1628
Mobile, AL 36633-1628

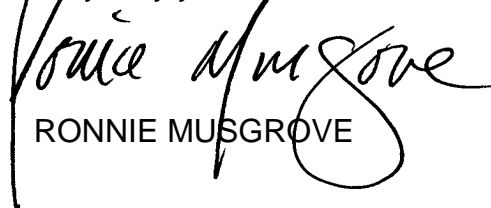

Dear Mr. Baker:

Thank you for attending the 2001 Annual Meeting of the Southeastern Council of Foundations in Biloxi, Mississippi. It is with your work and the resources of your foundation that the quality of life for everyone will improve throughout the Southeast and across America.

Forming public-private partnerships among foundations, governments, and businesses allows us all to stretch the few dollars that we all have into tremendous impacts with positive change. With our Computers in Classrooms project, Mississippi school children will have access to the same resources through the Internet that any college or university student does. We are preparing our children for the high-technology economy with the skills they need in their local classrooms.

I hope that you will join us as we make Mississippi the first state to have an Internet-accessible computer in every public classroom by the end of 2002. Should you need additional information on this project or would like to get involved, please contact the Mississippi Public Education Forum office at either 1-800-748-7626 or 601-353-5488.

Very truly yours,

RONNIE MUSGROVE

December 10, 2001

Forming public-private partnerships among foundations, governments, and businesses allows us all to stretch the few dollars that we all have into tremendous impacts with positive change. With our Computers in Classrooms project, Mississippi school children will have access to the same resources through the Internet that any college or university student does. We are preparing our children for the high-technology economy with the skills they need in their local classrooms.

I hope that you will join us as we make Mississippi the first state to have an Internet-accessible computer in every public classroom by the end of 2002. Should you need additional information on this project or would like to get involved, please contact the Mississippi Public Education Forum office at either 1-800-748-7626 or 601-353-5488.

Very truly yours,

RONNIE MUSGROVE

December 10, 2001

Ms. Gail W. Riley

Forming public-private partnerships among foundations, governments, and businesses allows us all to stretch the few dollars that we all have into tremendous impacts with positive change. With our Computers in Classrooms project, Mississippi school children will have access to the same resources through the Internet that any college or university student does. We are preparing our children for the high-technology economy with the skills they need in their local classrooms.

I hope that you will join us as we make Mississippi the first state to have an Internet-accessible computer in every public classroom by the end of 2002. Should you need additional information on this project or would like to get involved, please contact the Mississippi Public Education Forum office at either 1-800-748-7626 or 601-353-5488.

Very truly yours,

RONNIE MUSGROVE

December 10, 2001

With our Computers in Classrooms project, Mississippi school children will have access to the same resources through the Internet that any college or university student does. We are preparing our children for the high-technology economy with the skills they need in their local classrooms.

I hope that you will join us as we make Mississippi the first state to have an Internet-accessible computer in every public classroom by the end of 2002. Should you need additional information on this project or would like to get involved, please contact the Mississippi Public Education Forum office at either 1-800-748-7626 or 601-353-5488.

Very truly yours,

A handwritten signature in black ink that reads "Ronnie Musgrove". The signature is written in a cursive style with a large, sweeping flourish at the end.

RONNIE MUSGROVE

December 10, 2001

Ms. Danah C. Craft
Vice President
SunTrust Bank Atlanta Foundation
PO Box 4655 / MC 221
Atlanta, GA 30302

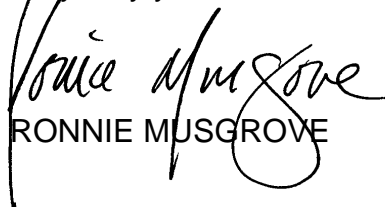

Dear Ms. Craft:

Thank you for attending the 2001 Annual Meeting of the Southeastern Council of Foundations in Biloxi, Mississippi. It is with your work and the resources of your foundation that the quality of life for everyone will improve throughout the Southeast and across America.

Forming public-private partnerships among foundations, governments, and businesses allows us all to stretch the few dollars that we all have into tremendous impacts with positive change. With our Computers in Classrooms project, Mississippi school children will have access to the same resources through the Internet that any college or university student does. We are preparing our children for the high-technology economy with the skills they need in their local classrooms.

I hope that you will join us as we make Mississippi the first state to have an Internet-accessible computer in every public classroom by the end of 2002. Should you need additional information on this project or would like to get involved, please contact the Mississippi Public Education Forum office at either 1-800-748-7626 or 601-353-5488.

Very truly yours,

RONNIE MUSGROVE

We are preparing our children for the high-technology economy with the skills they need in their local classrooms.

I hope that you will join us as we make Mississippi the first state to have an Internet-accessible computer in every public classroom by the end of 2002. Should you need additional information on this project or would like to get involved, please contact the Mississippi Public Education Forum office at either 1-800-748-7626 or 601-353-5488.

Very truly yours,

RONNIE MUSGROVE

December 10, 2001

Ms. Lorri McClain
Anverse, Inc.
P.O. Box 3188
Cartersville, GA 30120

Dear Ms. McClain:

Thank you for attending the 2001 Annual Meeting of the Southeastern Council of Foundations in Biloxi, Mississippi. It is with your work and the resources of your foundation that the quality of life for everyone will improve throughout the Southeast and across America.

Forming public-private partnerships among foundations, governments, and businesses allows us all to stretch the few dollars that we all have into tremendous impacts with positive change. With our Computers in Classrooms project, Mississippi school children will have access to the same resources through the Internet that any college or university student does. We are preparing our children for the high-technology economy with the skills they need in their local classrooms.

I hope that you will join us as we make Mississippi the first state to have an Internet-accessible computer in every public classroom by the end of 2002. Should you need additional information on this project or would like to get involved, please contact the Mississippi Public Education Forum office at either 1-800-748-7626 or 601-353-5488.

Very truly yours,

RONNIE MUSGROVE

Treasurer
Robert W. Woodruff Foundation
50 Hurt Plaza Suite 1200
Atlanta, GA 30303

Dear Mr. Tribble:

Thank you for attending the 2001 Annual Meeting of the Southeastern Council of Foundations in Biloxi, Mississippi. It is with your work and the resources of your foundation that the quality of life for everyone will improve throughout the Southeast and across America.

Forming public-private partnerships among foundations, governments, and businesses allows us all to stretch the few dollars that we all have into tremendous impacts with positive change. With our Computers in Classrooms project, Mississippi school children will have access to the same resources through the Internet that any college or university student does. We are preparing our children for the high-technology economy with the skills they need in their local classrooms.

I hope that you will join us as we make Mississippi the first state to have an Internet-accessible computer in every public classroom by the end of 2002. Should you need additional information on this project or would like to get involved, please contact the Mississippi Public Education Forum office at either 1-800-748-7626 or 601-353-5488.

Very truly yours,

RONNIE MUSGROVE

December 10, 2001

RONNIE MUSGROVE

December 10, 2001

Mr. John Cordaro
Trustee
Baptist Community Ministries
1450 Poydras St. Suite 1550
New Orleans, LA 70112

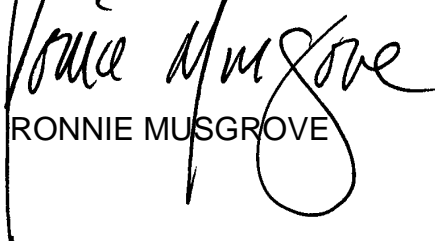

Dear Mr. Cordaro:

Thank you for attending the 2001 Annual Meeting of the Southeastern Council of Foundations in Biloxi, Mississippi. It is with your work and the resources of your foundation that the quality of life for everyone will improve throughout the Southeast and across America.

Forming public-private partnerships among foundations, governments, and businesses allows us all to stretch the few dollars that we all have into tremendous impacts with positive change. With our Computers in Classrooms project, Mississippi school children will have access to the same resources through the Internet that any college or university student does. We are preparing our children for the high-technology economy with the skills they need in their local classrooms.

I hope that you will join us as we make Mississippi the first state to have an Internet-accessible computer in every public classroom by the end of 2002. Should you need additional information on this project or would like to get involved, please contact the Mississippi Public Education Forum office at either 1-800-748-7626 or 601-353-5488.

Very truly yours,

RONNIE MUSGROVE

December 10, 2001

Vanda L. Davidson, M.D.
Trustee

Alexandria, LA 71303

Dear Ms. Texada:

Thank you for attending the 2001 Annual Meeting of the Southeastern Council of Foundations in Biloxi, Mississippi. It is with your work and the resources of your foundation that the quality of life for everyone will improve throughout the Southeast and across America.

Forming public-private partnerships among foundations, governments, and businesses allows us all to stretch the few dollars that we all have into tremendous impacts with positive change. With our Computers in Classrooms project, Mississippi school children will have access to the same resources through the Internet that any college or university student does. We are preparing our children for the high-technology economy with the skills they need in their local classrooms.

I hope that you will join us as we make Mississippi the first state to have an Internet-accessible computer in every public classroom by the end of 2002. Should you need additional information on this project or would like to get involved, please contact the Mississippi Public Education Forum office at either 1-800-748-7626 or 601-353-5488.

Very truly yours,

RONNIE MUSGROVE

December 10, 2001

Mrs. Cathy Vaughn
Program Director
Baptist Community Ministries
1450 Poydras Street, Suite 1550

We are preparing our children for the high-technology economy with the skills they need in their local classrooms.

I hope that you will join us as we make Mississippi the first state to have an Internet-accessible computer in every public classroom by the end of 2002. Should you need additional information on this project or would like to get involved, please contact the Mississippi Public Education Forum office at either 1-800-748-7626 or 601-353-5488.

Very truly yours,

RONNIE MUSGROVE

December 10, 2001

Mrs. Pamela Libys
Fin/Prog. Servs Mgr
Gulf Coast Community Foundation
PO Box 1899
Gulfport, MS 39502

Dear Pamela:

Thank you for attending the 2001 Annual Meeting of the Southeastern Council of Foundations in Biloxi, Mississippi. It is with your work and the resources of your foundation that the quality of life for everyone will improve throughout the Southeast and across America.

Forming public-private partnerships among foundations, governments, and businesses allows us all to stretch the few dollars that we all have into tremendous impacts with positive change. With our Computers in Classrooms project, Mississippi school children will have access to the same resources through the Internet that any college or university student does. We are preparing our children for the high-technology economy with the skills they need in their local classrooms.

I hope that you will join us as we make Mississippi the first state to have an Internet-accessible computer in every public classroom by the end of 2002. Should you need additional information on this project or would like to get involved, please contact the Mississippi Public Education Forum office at either 1-800-748-7626 or 601-353-5488.

Very truly yours,

RONNIE MUSGROVE

Dear Sissie:

Thank you for attending the 2001 Annual Meeting of the Southeastern Council of Foundations in Biloxi, Mississippi. It is with your work and the resources of your foundation that the quality of life for everyone will improve throughout the Southeast and across America.

Forming public-private partnerships among foundations, governments, and businesses allows us all to stretch the few dollars that we all have into tremendous impacts with positive change. With our Computers in Classrooms project, Mississippi school children will have access to the same resources through the Internet that any college or university student does. We are preparing our children for the high-technology economy with the skills they need in their local classrooms.

I hope that you will join us as we make Mississippi the first state to have an Internet-accessible computer in every public classroom by the end of 2002. Should you need additional information on this project or would like to get involved, please contact the Mississippi Public Education Forum office at either 1-800-748-7626 or 601-353-5488.

Very truly yours,

RONNIE MUSGROVE

December 10, 2001

Ms. Joyce T. Adger

Forming public-private partnerships among foundations, governments, and businesses allows us all to stretch the few dollars that we all have into tremendous impacts with positive change. With our Computers in Classrooms project, Mississippi school children will have access to the same resources through the Internet that any college or university student does. We are preparing our children for the high-technology economy with the skills they need in their local classrooms.

I hope that you will join us as we make Mississippi the first state to have an Internet-accessible computer in every public classroom by the end of 2002. Should you need additional information on this project or would like to get involved, please contact the Mississippi Public Education Forum office at either 1-800-748-7626 or 601-353-5488.

Very truly yours,

RONNIE MUSGROVE

December 10, 2001

Mr. Phillip H. Redmond
Associate Director
The Duke Endowment
100 North Tryon St., Ste. 3500
Charlotte, NC 28202

Dear Mr. Redmond:

Thank you for attending the 2001 Annual Meeting of the Southeastern Council of Foundations in Biloxi, Mississippi. It is with your work and the resources of your foundation that the quality of life for everyone will improve throughout the Southeast and across America.

Forming public-private partnerships among foundations, governments, and businesses allows us all to stretch the few dollars that we all have into tremendous impacts with positive change. With our Computers in Classrooms project, Mississippi school children will have access to the same resources through the Internet that any college or university student does. We are preparing our children for the high-technology economy with the skills they need in their local classrooms.

I hope that you will join us as we make Mississippi the first state to have an Internet-accessible computer in every public classroom by the end of 2002. Should you need additional information on this project or would like to get involved, please contact the Mississippi Public Education Forum office at either 1-800-748-7626 or 601-353-5488.

Very truly yours,

RONNIE MUSGROVE

December 10, 2001

Mr. Allen Mast
Vice President for Programs
Mary Black Foundation
945 E. Main Street
Spartanburg, SC 29302

Dear Mr. Mast:

Thank you for attending the 2001 Annual Meeting of the Southeastern Council of Foundations in Biloxi, Mississippi. It is with your work and the resources of your foundation that the quality of life for everyone will improve throughout the Southeast and across America.

Forming public-private partnerships among foundations, governments, and businesses allows us all to stretch the few dollars that we all have into tremendous impacts with positive change. With our Computers in Classrooms project, Mississippi school children will have access to the same resources through the Internet that any college or university student does. We are preparing our children for the high-technology economy with the skills they need in their local classrooms.

I hope that you will join us as we make Mississippi the first state to have an Internet-accessible computer in every public classroom by the end of 2002. Should you need additional information on this project or would like to get involved, please contact the Mississippi Public Education Forum office at either 1-800-748-7626 or 601-353-5488.

Very truly yours,

RONNIE MUSGROVE

The Toms Foundation
PO Box 2466
Knoxville, TN 37901

Dear Mr. Ramsey:

Thank you for attending the 2001 Annual Meeting of the Southeastern Council of Foundations in Biloxi, Mississippi. It is with your work and the resources of your foundation that the quality of life for everyone will improve throughout the Southeast and across America.

Forming public-private partnerships among foundations, governments, and businesses allows us all to stretch the few dollars that we all have into tremendous impacts with positive change. With our Computers in Classrooms project, Mississippi school children will have access to the same resources through the Internet that any college or university student does. We are preparing our children for the high-technology economy with the skills they need in their local classrooms.

I hope that you will join us as we make Mississippi the first state to have an Internet-accessible computer in every public classroom by the end of 2002. Should you need additional information on this project or would like to get involved, please contact the Mississippi Public Education Forum office at either 1-800-748-7626 or 601-353-5488.

Very truly yours,

RONNIE MUSGROVE

December 10, 2001

With our Computers in Classrooms project, Mississippi school children will have access to the same resources through the Internet that any college or university student does. We are preparing our children for the high-technology economy with the skills they need in their local classrooms.

I hope that you will join us as we make Mississippi the first state to have an Internet-accessible computer in every public classroom by the end of 2002. Should you need additional information on this project or would like to get involved, please contact the Mississippi Public Education Forum office at either 1-800-748-7626 or 601-353-5488.

Very truly yours,

RONNIE MUSGROVE

December 10, 2001

Mr. Alan E. Ronk
Executive Director
Foundation for Roanoke Valley, Inc.
P. O. Box 164
Roanoke, VA 24006

Dear Mr. Ronk:

Thank you for attending the 2001 Annual Meeting of the Southeastern Council of Foundations in Biloxi, Mississippi. It is with your work and the resources of your foundation that the quality of life for everyone will improve throughout the Southeast and across America.

Forming public-private partnerships among foundations, governments, and businesses allows us all to stretch the few dollars that we all have into tremendous impacts with positive change. With our Computers in Classrooms project, Mississippi school children will have access to the same resources through the Internet that any college or university student does. We are preparing our children for the high-technology economy with the skills they need in their local classrooms.

I hope that you will join us as we make Mississippi the first state to have an Internet-accessible computer in every public classroom by the end of 2002. Should you need additional information on this project or would like to get involved, please contact the Mississippi Public Education Forum office at either 1-800-748-7626 or 601-353-5488.

Very truly yours,

RONNIE MUSGROVE
