> On May 13, 2000, I will be standing in front of parents of missing
> children

from all over the world. I will be offering them hope in the form of a plan that I and many others have been working on for three years. This plan is simply the biggest change in the missing children's laws in US history. If you, the parents of missing children, and missing children's agencies around the world will work together, I believe that we can pass this new law and as a result, tens of thousands of children will be saved.

Credibility is by far the most important factor here. By now, most of the parents and many of the agencies believe in you. Now I need you to believe me when I say that this will work. I want you to think back over the last three years. Have I ever sent out anything without checking it thoroughly? Have I ever sent one letter that I later had to retract as a mistake? To my knowledge I haven't. I realized that by far the most important thing in getting the laws changed would be credibility. Instead of taking people's word for things, I always checked them out. I wore myself out making sure everything was right, that there were no problems, etc. I have been researching what I am about to propose for three years. I have talked to hundred of parents of missing children over the last three years. I have gone to Washington to attend their conferences. I have stood with them in front of the White House. I have held them in my arms as they cried. I have felt their pain. During all of this, I kept looking for that one perfect solution. Always searching for that one change in our laws that would bring home the most children. I have talked to people about hundreds of laws that they wanted to propose and while some were good, they simply weren't enough. We needed a major solution to the problem; something that could be applied in every state in the country rather than solely through the federal government. Most federal laws and programs are a failure when it comes to bringing home the children. We need state laws where people will feel that local government is totally behind them, that those helping search for the children will take the child's disappearance personally.

Last year while standing in front of the White House, I met a man who had the solution to the problem of missing children. This man was looking at all the parents who had gathered to light candles for their children. His whole body was shaking so badly he could barely stand. He was feeling the pain of every person there. We held him in our arms and he let out his own pain. John Trout told me afterwards about his plan to help the children, but he was frustrated because he didn't know how to get enough people together to put his plan into action.

Vivian's Law, named after John's daughter who has been abducted not once, but

twice, is based on something so simple. I am amazed that no one else ever
thought of it. John spent seven months calling missing children's
agencies
inquiring into present laws that were effective, laws that were
ineffective
and, more importantly, what state was having the highest level of success
in
returning missing children. He had quite simply bypassed doing things the
hard way and had asked the experts, "What State Has the Best Laws for
Missing
Children?" He told me the answer was almost always California.

I did my own research, made calls to the missing children's agencies and I
got the same result. The laws for missing children in most states are
almost
a waste of time. They do little or nothing to bring home missing children.
However, California has a high success rate in bringing home their missing
children, and even more importantly, in preventing abductions in the first
place. What John proposed was simply taking the existing missing children
laws from California, that are the best in the country, and then trying to
get other states to adopt them.

We tested the waters by asking all of you to see if we could get these
laws
passed in Florida. I am happy to announce that the Governor's office in
Florida liked what we presented. They have offered us a lot of advice in
helping to get it passed (we have to wait for the next government session
before we can introduce it for a vote). We learned a lot from the effort
in
Florida. And now, with your help, we are ready to start asking the
Governors
in all the states to support Vivian's Law.

First, here is some information about the Candlelight Vigil For Missing
Children. Parents of missing children around the world consider May as
Missing Children's Month. May 25th is National Missing Children's Day.
Different missing children's organizations go to Washington and other
cities
to stand up for the children during May. This will be my third year going
to
Washington to the PARENT conference on missing children and to stand
outside
the White House for the Candlelight Vigil for Missing Children. The first
year was emotionally devastating. Simply there was no support for the
parents. They were alone, and they were in tears. The second year people
from the Internet came out to support them and so did many members of the
media. For the first time the parents felt a spark of hope. On May 13th,
at
9 am, I will be speaking to the PARENTS about our plans to help them, how
we
hope to turn that spark of hope into a roaring flame.

I realize that most of you cannot come to the conference or the vigil, you
will get a chance to help, but I would like to offer any of you that want
to
attend that chance one last time. Here is the information on the Candle

Light

> THE PLAN

> The plan to help the parents is very simple. At the conference, I will
> speak
> to the parents about the problem. Believe me, they all know what the
> problems are. Then I will talk to them about John's solution. The law
> calls
> for the state to help take the financial burden off of the parents and let

> attorneys in the search (they find a lot of kids in California). It also
> allows the district attorneys to help get warrants for the kidnapers much

> and
> other state officials. There will also be a tutorial (you know I like to
> write tutorials for just about everything) on how to approach government

officials, on the process they need to follow and how to get the law passed.
> Each of these parents (and others we recruit from other missing children's
> agencies, etc.) will be the leaders for their states. They will network
> with
> as many parents of missing children and supporters missing children in

THANK YOU

Thank you very much for helping the children. I honestly believe that
this
is the best way to help bring home as many missing children as possible.
Remember the key to all of this is that Vivian's Law is based on a
California
law that is already bringing home thousands of missing children every
year.
Children that would still be missing if this law did not exist. That
there
is no one but you, me, and the rest of the people reading this letter that
knows about this. It really is up to each of us to tell as many people as
possible. For all the parents, I want to thank you for your help. My
personal thanks to all the members of LMU, Plymouth, Phoenix, Editors
Exchange, Harmony, United Editors, The List Connection, PARENT and all the
other organizations that are working together to help give the parents of
missing children, a Ribbon of Hope.

One final note I would like to make. If this all works later we can apply
the same principles to changing the laws on child abuse, treatment of the
disabled, and much more. Can you imagine the happiness that will be
attained
