

Statement from Governor Ronnie Musgrove:

The cost to build this capitol was just over \$1 million, and that's a small price considering tremendous history of this building and the grounds it occupies. Many of the state's great success stories, such as the teacher pay raise or the Nissan package, were crafted in this building. Because of the good work of Frank Critz 100 years ago, the success stories of the state will continue to be written in our magnificent state capitol.
