

Statement regarding Nissan:

“In my first State of the State address, I talked about what we could do in Mississippi, and for Mississippi, if we worked together to capitalize on our energy and our potential. My office worked closely with the Legislature, the Mississippi Development Authority and other economic development experts to pass the Advantage Mississippi Initiative.

“The Nissan project is a great example of what can be done. We worked with the Legislature, our congressional delegation, MDA and so many others, and crossed a bridge built on cooperation and communication.”
