

“The Governor understands the importance of the Trauma care network to the people of Mississippi. That’s why he supported and signed legislation that included the Med in the Mississippi trauma care network.”

Background:

In addition, the Governor asked that the legislature establish equitable funding for the Med and Mississippi hospitals that participate in the trauma care network.

The Governor and Rica Lewis Payton strongly recognize the importance of the Med to the access of health care to the people of north Mississippi. That’s why under the Governor’s leadership, the Med was enrolled, for the first time, as a Mississippi Medicaid provider in the DSH and UPL programs to provide critical health services to the people in North Mississippi.
