

NAM online:

The U.S. manufacturing industry produces in all 50 states.

To illustrate what is happening to manufacturing across the country, the NAM produces graphs presenting state-by-state data on manufacturing employment. The data are obtained from the Bureau of Labor Statistics, U.S. Department of Labor, and are updated monthly. The data are presented in the form of graphs, with brief text highlighting the most recent data and changes from **July, 2000, when manufacturing employment peaked**. Since that time, 2.6 million jobs have been lost. The manufacturing job figures and changes are shown for each state.

AR lost 1,600 in June 2003, Since July 2000 – lost 32,700, 13.%, 1 out of 7
AL lost 700 in June 2003, Since July 2000 – lost 55,200, 15.7%, 1 out of 6
GA gained 200 in June 2003, Since July 2000 – lost 80,800, 15.3%, 1 out of 7
FL lost 2,700 in June 2003, Since July 2000 – lost 68,800, 15.0%, 1 out of 7
IL lost 4,300 in June 2003, Since July 2000 – lost 140,900, 16.2%, 1 out of 6
LA gained 600 in June 2003, Since July 2000 – lost 19,000, 10.7%, 1 out of 9
MI lost 1,200 in June 2003, Since July 2000 – lost 162,300, 18.0%, 1 out of 6
MS lost 1,600 in June 2003, Since July 2000 – lost 43,300, 19.4%, 1 out of 5
NC lost 4,300 in June 2003, Since July 2000 – lost 151,000, 19.8%, 1 out of 5
SC lost 2,400 in June 2003, Since July 2000 – lost 58,300, 17.4%, 1 out of 6
TN lost 100 in June 2003, Since July 2000 – lost 73,200, 15.0%, 1 out of 7
TX lost 6,000 in June 2003, Since July 2000 – lost 151,800, 14.2%, 1 out of 7
