

## MDOT- Talking Points

- I appreciate your concern.
  - Unfortunately, as Governor, the Mississippi Department of Transportation is one of those departments that I do not have control of.
  - MDOT is controlled by three elected Transportation Commissioners who are responsible for overseeing the effective operation of our Dept. of Transportation.
  - We understand that they may be experiencing some problems.
  - **We are glad to work with the Transportation Commissioners to explore the options for resolution of problems they are experiencing.**
  - **I am committed to do everything that I can to ensure that the infrastructure and transportation needs of our people are met in the most efficient, cost effective manner possible.**
  - In relation to specific problems that they are experiencing, I am going to have to refer you to the commissioners because they will know first hand what is happening.
